

MOLD MAKER I

Quality Molded Plastics Ltd. is a long-established rotational molding company with a mold fabrication facility. We are looking for a permanent full-time mold maker responsible for the fabrication and repair of rotational molds. The successful candidate will be self-motivated and must be able to work individually as well as in a team environment. Attention to detail and quality is required and expected.

The work schedule is dayshift Monday – Friday. An EDO schedule can be arranged once the candidate is established with the company.

QMP offers a competitive compensation and benefits package. Wage will be commensurate with the knowledge, skills, abilities, and experience of the successful candidate.

Additionally, the Mold Maker I has these specific duties and responsibilities:

- Interprets drawings and sketches, plans details and safe working procedures.
- Suggests proper methods and procedures of the work to be done.
- Cuts and shapes sheet metal.
- Performs work requiring a working knowledge of welding and its effects.
- Sets up, assembles, cleans, and prepares items to be welded.
- Performs welding, grinding, polishing, sandblasting.
- Sets up, and adjusts and operates: hand torch, plasma arc cutter, brake, shear, sandblaster and hand tools.
- Operates forklift and overhead cranes to transport materials, equipment and tools.
- Keeps tools, equipment and working area in a safe, clean, and orderly condition.
- Plant improvement projects and maintenance activities.

Preferred Qualifications:

- High school diploma
- Technical training in welding and/or fabrication
- Ability to read and interpret drawings
- Two years experience in metal fabrication
- Artistic craftsmanship
